

FRANK'S®

FRANK'S SPEED SHOE

Patent # 6,675,919

“FASTER DRIVING WITH LESS EFFORT”

**HOW WILL THE SPEED SHOE
BENEFIT YOU?**

Drives pipe deeper

Drives pipe in less time

**No longer a need for
wash-outs**

***FRANK'S “SPEED SHOE” can get your drive-pipe down
when the common drive shoe just isn't enough!***

The "SPEED SHOE" is designed as an aid to driving pipe through hard consolidated sand layers with AMAZING results. The leading edge of the "SPEED SHOE" is serrated to chip away the consolidated sand to ease driving. Frank's has found that the "Speed Shoe" not only drives faster, but takes less blows per foot and achieves more penetration than the standard shoe. The chart below shows two drive jobs driven off the same platform in the Gulf of Mexico. Both were 30" pipe driven with the same D-62 hammer. Note the difference not only in the total penetration, but the blows per foot taken to drive each string.
